

## News Admin Control Panel

1

### Filter News

This block shall be used to filter news for Admin Users. This filtration will be based on the News Title, News Category, From Date and To Date. User can search on the basis of any of the given parameters or all of them.

2

### Add News

This button shall be used to add a news into the system. (Flow shown in the next pages)

3

### News Grid

Already added news will be shown here in the grid form. User can click on any of the news title to edit the news details (shown in the next pages)
