_____

User Default

Admin will determine whether the page is user default or not. If yes, then the page will be shown at first when a logged in user clicks on the dream.

Public Default

if this option is checked than this page will be shown to anonymous user on clicking the dream.

Published

if option is checked, then the page will be visible to audience that it has been authorized. if not, then it will only be visible to the admin users.

Authorization Roles

This list will show the authorization options to the audience type, this list will be multiselected and can be edited later.

Delete Page

User will be able to delete the page and all its content. this option should be used carefully as there is no Undo functionality in the system.

![8] **Add Page**

When user clicks on the green "Add New Page" button, this form will be visible. All the fields are identical to the above ones and user will be able to add pages to the dream. If user checks the user default check box, and there is already a default page, then he will be shown alter message, same is the case for public default.
