Custom Text bank

This component will be used to dependently add content and data into dream pages. This component is configurable and its admin page can be accessed through the link in the component name after when it is saved from page builder.

Page and Dream Name
This is the page and dream name for which this custom text bank is being used. Clicking on this will navigate the user to the original rendered page. Basically this link is to preview the changes and content entered in the custom text bank.

Custom Text Bank Name
Here, user shall enter the name for the text bank. For example, if this text bank is for rendering the title of ECAT Dream, the name could be "banner_title_ecat".

Tags for Text Bank
If the user wants to attach some tags with this custom text bank, than it could be done from this field.

Import from Existing Text Banks
If the user wants to Import the existing text banks, than clicking on this link will reveal existing text banks saved in different dream. This function will copy the contents of the existing text banks into the current.

Text Bank Content Area
In this editor, HTML can be entered by clicking on the "Source" button. other options are also available. By pasting the content directly without the source view shall

ECAT/Default

Page and Dream Name ①

Name ☐   Tags ☐ × ▾

Lesson Menu

This component will be used to create the menus and subsequent pages for a dream. This component is also configurable and it's admin page will be accessed same as above control. (Step by step procedure of creating Text banks and Lesson Menu will be demonstrated in the Dream Creation Tutorial)

1. Add Main Menu

This button will be used to add the outer most (Main Menu). Clicking this link will clear all the fields readying them to add a new main menu.

2. Name of Lesson Menu

Here, the name will be entered. Care should be taken that the name of lesson menu should not contan any special character like (_, &, %, $) etc.

3. Display Name for Lesson Menu

This will be the display name for lesson Menu as it will appear on client page, this could any thing and can contain special characters also.
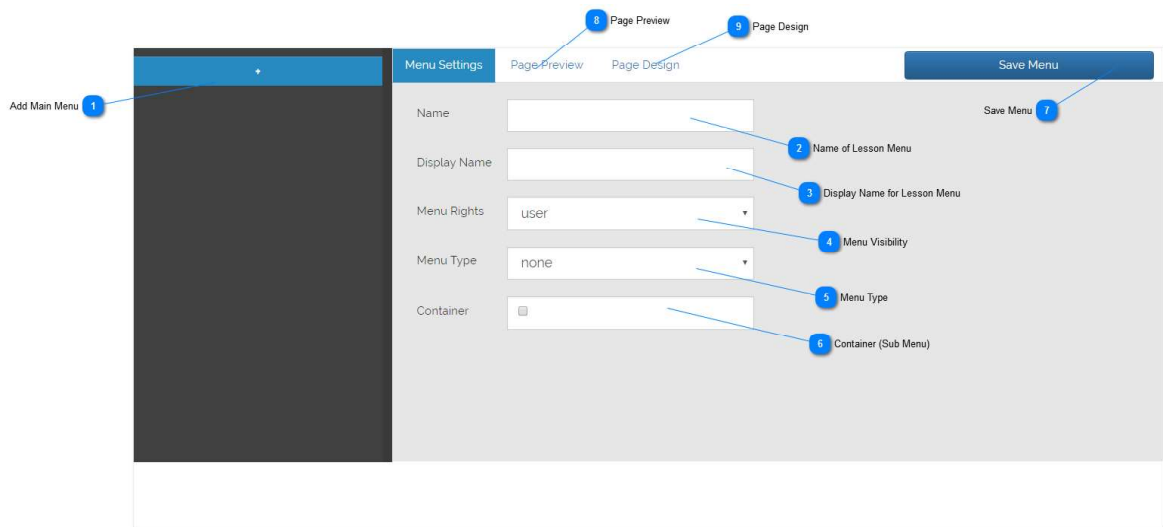

4. Menu Visibility

This will set the rights of which type of audience the menu can be seen. If it is meant to be for general public or for general audience.

5. Menu Type

From this list, we can determine which type of menu is, for example, there are three types of menus given in this list, first is "None" it means it is simple menu and does not

contain any weightage. Second is "Quiz" that means the added menu is for Quizes and third is "Multimedia" that means it is for reading and other activities and user will mark it as completed for its weightage.

6 Container (Sub Menu)

This check box will determine whether the menu contains sub menus or not. This link will only work after when the main menu has been saved from the big blue button shown on top right of the screen.

7 Save Menu

All the changes made to the menu, addition of new containers etc will not take place until this button is pressed.

8 Page Preview

This tab will show the Preview of the Content that has been designed through the "Page Builder" provided in the next tab "Page Design"

9 Page Design

Here, page builder from the "Admin Control Panel" has been provided and it will be used to design the content areas for the added menus and sub menus. Step by step tutorial is provided in the next topic "Creating the Content for ECAT Dream"
